Instructions for Display Setting

The display settings for bright stars and Messier objects can be changed.   You can select from "Display", "Hide" and "Zoomed Display".

Procedures

① Press Menu to display the System Menu.   Choose Chart Setting with the ↑· ↓ keys and press Select to enter.

② The Chart Setting screen is displayed.   Move the cursor with the ←· → keys and select your setting preference with the Value+, Value- keys.   Choose OK and press Select to enter.

③ If you choose Always ON , the names of the bright stars and Messier objects will be always displayed.

④ If you choose Always OFF , the names of the bright stars and Messier objects will be hid except for the name of the selected target.

⑤ If you press the Zoom+ key, the star chart will be zoomed. If you press the Zoom+ key once again, the star chart will be zoomed furthermore.
